Summary

Graduating student specialising in system design
economics / mechanics / visuals - fast prototyping
and play-test iteration using website coding as my working method

Skills

Work-low • Level design, combat system, interaction system, economy systems

- UI/UX design • Prototyping • Dialogue and story writing • Unity
- ClipStudioPaint , Photoshop, InDesign, Word, Excel, GitHub, Canva, Miro

Work Experience

Gluttony Monster- team Leader

February 2025 – May 2025

- Overlooked student team of 5
- System pipeline, asset organization, team direction, Unity
- Map staging, level progression , mechanic development
- Economy System building - flow, exchange, convert, trade, inventory and drain of resource

Personal Experience

Outskin The Skin-walker

May 2026 - present

- Utilise web coding to prototype mini games
- GitHub as source control, paired Visual Studio and Claude AI
- Designed dialogue using flowcharts for event system navigation
- Economy diagrams for balancing game state
- Microsoft Word for documentation
- Learned to approach system design in three states:
bones (purely functional), meat (polishing the function and adding variation), skin (decorating the function)

Level Analysing

Feb 2025 - present

- Self-practice for analysing different games
- Terraria - map generation and progression
- Animal Crossing - trade mechanic
- Monster Hunter Wilds - fight mechanic
- Resident Evil - inventory mechanic
- Genshin - gacha / gambling system

Education

NABA - Nuova Accademia di Belle Arti

- Graduation expectancy – November 2026
- Course : New Technologies
- Major in Game Design
